

improving working environments

“ a great illustration of our futureproof furniture solutions”

### Watch this space...

Thinking Space Systems has just been awarded contracts with:

- UBS Bank – MW Video
- Whisper Films – MW Video
- University of South Wales
- Leeds/Bradford Airport
- Ramsgate Tunnel
- SOHAR Port
- South Lanarkshire Council
- Nissan

### News...

Thinking Space Systems Pty Ltd will shortly be celebrating the opening of its' new and very first factory in Australia. The Sydney-based premises will shortly be receiving their stock order of materials which are currently en-route from the UK Headquarters. Managing Director Lee Evans (above), visited us back in April for some product update training.

## Moving spaces for Sheffield Transport Centre

Thinking Space Systems has just completed the relocation of Sheffield City Council's Urban Transport Centre. Having completed the original control room in 2008, a redevelopment of the site at Carbrook meant that the control room had to be relocated across the city to Sheffield Town Hall, a grade 1 listed building. Thinking Space were awarded the contract, by competitive tender, to move the existing consoles to the new location and undertake a complete fit out of an empty office in

the town hall and bring up to control room standards. In addition, a brand new Evolution media wall was manufactured and in partnership with Eyevis, a video wall system was created. As well as the challenge of carrying out work in a listed building, the project needed to be completed within tight timescales and whilst the building was operational. With negligible work needed to the consoles being eight years old, the aluminium build system offered by Thinking Space ensured that the consoles were broken down, transported and re-assembled on site quickly and efficiently, giving cost savings and promoting recycling benefits to the client.

### Blog...

Our official charity for 2016, Romsey Young Carers, was the motivation behind our participation in the Romsey Relay Marathon in April. Other fundraising initiatives included a company-themed 'Bake-off' competition and currently, a sunflower-growing competition. And all for a great cause!

### See us at...

We'll be exhibiting at IFSEC International on 21st – 23rd June 2016 at London ExCel. See us at stand H1070 where we will be demonstrating our range of security furniture, including a height adjustable console and media wall solutions. Meet our experienced international sales team, who will be on hand throughout the event to assist you with any queries.

In the factory...

**EVOLUTION**  
media wall technology

## New brochure for 2016

Hot off the press is our new Evolution media wall literature for 2016. The brochure contains the latest solutions offered by Thinking Space for mounting large flat screen monitors using aluminium extrusions, with plenty of example applications. Developed by Thinking Space and launched in 2010, the media wall has been continually developed to provide a flexible solution and is suitable for a multitude of environments, not just for control rooms but at exhibition stands, reception areas, conference rooms and ATC training simulators.

We offer a standard range of configurations available as an "off-the-shelf" solution, as well as completely bespoke media walls with our free award-winning design service. As well as non-standard configurations, bespoke solutions can include desktop mounts, ideal for process control rooms as well as built-in storage cupboards and simulators, ideal for ATC training facilities.

## Height adjustable consoles for Cleveland Fire Brigade

Thinking Space have recently despatched five height adjustable consoles for the new watchroom at Cleveland Fire Brigade. Staff are due to move to their new location in July, where we hope to bring you photos of the consoles "in-situ", with the control room fully operational.

## New product range coming soon...

Kanya have just announced a brand new product range for 2016. The 45mm base extrusion range will be hitting our shelves here shortly with a brochure on its way too, so keep an eye on our website for further details.

## Lab test car for SAIC

A project over a year and a half in the making left the factory bound for Birmingham and long-standing clients, SAIC. The lab test car was created from a complex set of technical

drawings provided by the client, which were then broken down into 143 separate drawings by our Kanya draughtsperson in readiness for its manufacture. Colour coding the manufacturing drawings then aided our production team who were able to assemble the structure in a methodical manner before it left the factory.

## Production furniture for University of Sussex

After visiting our stand at BVE, the team at the University of Sussex invited MW Video to their site with a view to design technical furniture for their production gallery.

The space allocated for the gallery was tight due to the depth of the room, yet the requirement to provide a desk suitable for up to 6 operators was still achievable. After a couple of design alterations, the final layout was agreed using our bespoke ProDesk solution.

Provisions were also made to allow the desk to be extended once rack mounted legacy equipment has been removed from the room.

"The team from MW were great. All our requirements were captured during a detailed site visit and we were able to iterate the design a number of times to make sure we had the exact desk that we required. MW also invited us to their workshop so we could acceptance test the desk and finalise the position of various mounts. Overall we are really happy with the desk, the quality and the service."

## New Tablet mounts now available

Novus have recently introduced a brand new lockable tablet mount to their range of RetailSystem products. The TabletSafe from Novus is available in two versions, one for Android devices and one for Apple and is suitable for the Ipad 1,2,3 and 4 and the Ipad Air/Air2. The tablet is neatly locked away inside its display case, which can be mounted using a wall mount, desk stand or floor stand.
